Capito: learn money by growing a practice portfolio

Vanguard India brief: digital financial literacy for Grade 11–12 students in Hyderabad. Status at M2 (11 Oct, 04:00).

1. What changed since M1

- **Name settled:** the working name is now the product name, Capito, across the app, page title, saved-game keys and docs.
- **Built, not just designed:** the simulation engine, life events with consequences, the portfolio and Plan the Month, all calculators, Scam Shield, the lesson player, the home page and the Word Bank now exist as working code.
- **One lesson player for every lesson:** gut-check, 5–8 swipe cards with tap-to-open Word Bank terms, tap-sort and reveal activities, an embedded tool, a 3-question quiz with teaching feedback, then practice money and Plan the Month. Lesson 9.1 adds the 10-question final quiz.
- **Navigation:** a Tools page lists every calculator; the home page has a single Continue button that always points to the next step (plan the waiting month, then any waiting life event, then the next lesson).
- **How we check work:** each pull request runs typecheck, all tests and a production build locally before it is merged with a merge commit; *main* has stayed buildable after every merge.
- **Scope order:** a complete English, on-device playthrough comes first. Server sync, the NGO dashboard and Hindi/Telugu follow it (see plan).

2. What is built

Area	Status	Details
Simulation engine	**Done**	Deterministic reducer: wallet and buckets, month-close (automatic payments, interest, depreciation, scripted market, goal checks), credit score with score-based loan offers, Money Health Score, milestones, shortfall rules.
Life events	**Done**	**25 events** across levels 1–8 (19 life events, 6 scam alerts). Each choice has a good, mixed or bad verdict, money and meter effects, "what if" previews of the other choices and one try-again.
Finance library	**Done**	SIP, lump sum, goal SIP, EMI, FD, RD, inflation, depreciation, slab tax and more, shared by the engine and the calculators; every game number lives in one config file.
Lessons	**20 merged**	1.1, all of levels 4–9 (4.1–9.1). **In review:** 1.2 goals, 1.3 budget, 1.4 net worth (23 of 29). **Next:** levels 2–3 (6 lessons).
Lesson player	**Done**	All steps above; payout ₹2,000 + ₹1,000 per correct answer; a retry pays only the improvement; works at 360 px and 1280 px.
Portfolio, Plan the Month	**Done**	Net worth, Health Score breakdown, buckets, wants and goals, things I own, loans, automatic deductions first, live preview of the month.
Calculators and tools	**Done**	15 configurable calculators plus Budget Builder, UPI Practice and Bad-Year Simulator. **Next:** visual restyle and a grouped tools hub.
Scam Shield	**Done**	13 message scenarios, the 5-point Check-it tool and a "scammed, now what?" walkthrough. **Next:** connecting results to the shield meter.
Home, Word Bank	**In review**	Level map (done / open / locked), Continue button, month and wallet; searchable Word Bank with 90 plain-language terms.

3. Tests

Area	Tests	What they prove
Content checks	295	Every lesson, event and term matches its schema; every text key exists; 5–8 cards and exactly 3 quiz questions; rupee figures in lesson text match the formulas; guardrail lint for product names and advice wording.
Engine	132	Month-close order, shortfall and credit rules, scripted market episodes, health-score band edges, events, what-if leaves state untouched, same actions give the same state.
Finance and core	46	Hand-computed figures: SIP ₹10,000 × 15 years at 10% = ₹41.79 lakh; EMI on ₹6,000 over 6 months at 18% = ₹1,053; FD ₹6,000 for 6 months at 6.5% = ₹6,195; RD ₹500 × 6 ≈ ₹3,057; phone ₹6,000 after 6 months ≈ ₹5,020.
Screens, tools, Scam Shield	34	Routes render, lesson 1.1 played end to end, retry payout, final quiz, portfolio and event screens, calculator registry, Scam Shield scoring.
Total on main	**507**	**All passing; production build succeeds. With the pull requests in review merged together: 552 passing.**

4. Plan to the final submission (11:00)

Work	Status	Target
Merge home, Word Bank, lessons 1.2–1.4	**In review**	Before 04:00
Lesson → Plan the Month → life events flow; buckets unlock as lessons finish	**Next**	05:30
Levels 2–3 content (bank accounts, UPI safety, emergency fund, insurance, RD)	**Next**	06:30
Tools restyle and grouped tools hub; Scam Shield moves the shield meter	**Next**	06:30
Final quiz screen, end-of-game summary and money plan card; portfolio polish	**To do**	07:30
Two full playthroughs (phone and laptop), bug fixes, guardrail read of every lesson	**To do**	08:30
Hosted build updated on every merge; README and licence	**To do**	09:00
Final report, slides, demo video (under 4 minutes), code archive	**To do**	10:45

After the English playthrough, if time allows: Hindi and Telugu (all text is already keyed, so a language is new files plus review), offline install, and server sync with the NGO dashboard. If time runs short these are presented as designed, not as built. Guardrails throughout: we explain, never recommend a product; every projection is labelled an assumption, not a promise; no personal data is collected.
